The Chemistry of Things - aquimicadascoisas.org "The Chemistry of Things" aims to unveil the chemistry hidden in our day-to-day lives and show how the recent developments of Science contribute to the welfare of Society. Everything around us, in Nature and elsewhere is made of "chemicals". Chemistry - Wikipedia Chemistry is a branch of physical science that studies the composition, structure, properties and change of matter.[1][2] Chemistry includes topics such as the properties of individual atoms, how atoms form chemical bonds to create chemical compounds, the interactions of substances through intermolecular forces that give matter its general. The Chemistry of Toothpaste - www.ChemistryIsLife.com Toothpaste is paste used on a tooth brush for cleaning teeth and a product well known by Americans and used frequently each day. I chose to research toothpaste because I wanted to show people how much chemistry is involved in something as simple and commonly used as toothpaste.

What Is Chemistry? - Live Science Chemistry is the study of matter, its properties, how and why substances combine or separate to form other substances, and how substances interact with energy. Chemistry - definition of chemistry by The Free Dictionary 1. (Chemistry) the branch of physical science concerned with the composition, properties, and reactions of substances. See also inorganic chemistry, organic chemistry, physical chemistry. The Chemistry of Coconut Oil - www.ChemistryIsLife.com Coconut oil is the oil extracted from the kernel or meat of the coconut. It serves many uses from culinary and nutrition to hair and beauty. I chose coconut oil for my chemistry project because I'm fascinated with the wide variety of functions this product provides.

The Chemistry of Chocolate « The Chemistry of Things Some of the most sublime pleasures we have in life exist only thanks to chemistry! To prove it, today we speak of chocolate! The chocolate we eat today is the result of a long process of discovery, experience and innovation.
